

Dump truck (rigid chassis up to 50 tonnes) (assessment and refresher for experienced operators only) 2 machines

Course Details

- Title: Dump truck (rigid chassis up to 50 tonnes) (assessment and refresher for experienced operators only) 2 machines
- Product Code: LAA5711
- Type: Training Course
- Duration: 1 Day

Throughout the land-based and construction industry dump trucks are an important machine on site as they are able to handle difficult terrain whilst carrying large loads, therefore making them a flexible piece of equipment.

Our Dump Truck (rigid chassis up to 50 Tonnes) refresher course is for you if you have experience in the operation of these machines. The course will run for one day and our experienced instructors will help guide you through the key fundamentals of the dump trucks capabilities so you are able to use it effectively and safely.

Who is it for?

Our assessment and refresher or conversion course is for anyone with experience who uses the dump truck (rigid chassis up to 50 Tonnes), in either land-based industries or the construction industry, and will provide you with the opportunity to practice and update your skills, and gain certification. The one day course will allow you to develop the skills and knowledge required in order to operate the machine in a safe and confident manner.

What will you get from it?

- Identify the basic construction and components, and the purpose and use of all controls and gauges.
- Identify and comply with manufacturers' instructions in accordance with the operator's handbook, other information sources and applicable legislation.
- Carry out all pre-use and running checks.
- Set the dump truck for site and road travel.
- Travel over differing types of terrain, including rough undulating ground, in a loaded and unloaded state.
- Travel up and down substantial inclines in a loaded and unloaded state.
- Manoeuvre in confined areas using forward and reverse direction, in a loaded and unloaded state.
- Position the dump truck to receive loads.
- Comply with loading procedures.

- Ensure load integrity and security.
- Discharge loads into trenches and over edges.
- Place the dump truck in an out-of-service condition.
- Explain the loading and unloading procedures on and off a transporter.

Course sessions:

- Working in the construction industry
- Components of dump trucks
- Stability of the machine
- Accident prevention
- Pre-shift checks
- Starting/Stopping the machine
- Daily checks
- Operating the machine
- Advanced operation
- Transportation
- Site safety

The things you need to know:

Duration:	1 Day
Max no of learners:	4
